About the Data Centre Pricing UK - 2015 to 2020 report

The Data Centre Pricing UK – 2015 to 2020 report is based on a survey of some 150 Data Centre providers and includes a survey of 315 Data Centre facilities across the UK – with many Data Centre providers having multiple facilities.

This report provides a unique overview of Data Centre pricing in the UK market – which is currently the largest in Europe by raised floor space and has amongst the highest average rack space pricing per month of over GBP 665 (Euro 939) per month per standard retail rack of space. (The average UK rack space rate is currently the fourth highest in Europe behind Austria, Denmark and Switzerland – but higher than the other key European markets of France, Germany and the Netherlands).

The Data Centre database can be segmented by location and the 3 main types of Data Centre provider segment used in this report. The Data Centre segment types used are in this report to distinguish between facilities and whether the Data Centre is Carrier Based, Carrier Neutral or a Premium Data Centre provider are shown below:

- i) A Carrier Neutral Data Centre provider for the purposes of this report - is defined as being a company, which is not part of a domestic network provider and has multiple telecoms networks from a facility
- ii) Carrier Based Data Centre provider for the purposes of this report - is defined as being a subsidiary of a telecoms provider and is able to provide a limited choice of telecoms networks from a facility.
- iii) A Premium Data Centre provider for the purposes of this report - is defined as being able to support high-density power per rack combinations of up to 20 kW or above.

The pricing information in the report is obtained in confidence from the Data Centre companies themselves and is used to derive an average market price for rack space or per square metre overall and for the Carrier Based, Carrier Neutral and Premium Data Centre sectors.

Coverage:

150 Data Centre providers and includes a survey of 315 Data Centre facilities, selected key data centre players in the UK covered include:

AlphaDEX, Aimes Grid, Ark Data Centres, BT, CWCS, CenturyLink, Cobalt DataCentre, Colt Telecom, Datum Data Centre, Digital Realty, Equinix, Everest Data Centre, Eurohub, Fast2Host, Global Switch,

Table of Contents:

- A list of tables and charts used in the report
- A list of Data Centre companies mentioned in the report
- Executive Summary – UK Data Centre Pricing
- The main highlights of the Data Centre Pricing UK 2015 to 2020
- Introduction – Data Centre Pricing UK – 2015 to 2020 report
- Research Methodology
- The main Data Centre segments identified in the report
- The Data Centre tier classes used in this report
- The Data Centre power usage efficiency used in this report
- The UK Data Centre pricing used in this report

Chapter One – A market overview of the UK Data Centre market

- Introduction
- The landscape for Data Centres in the UK
- The key UK Data Centre players
- UK Carrier Based Data Centre segment
- UK Carrier Neutral Data Centre segment
- UK Premium Data Centre segment
- Key Point Summary

Chapter Two – Pricing for Data Centres in the UK

- Introduction
- Average rack space pricing for UK Data Centres
- Installation charges
- Administration & other charges
- UK Data Centre pricing per square metre
- UK Data Centre pricing for cage space
- UK Data Centre pricing for cross connects
- UK Data Centre pricing for power
- Average customer power per UK Data Centre facilities
- Average UK Data Centre pricing per kW bundle per rack
- Average UK Data Centre watts per square metre pricing
- Average Data Centre price trends in the UK
- UK Data Centre pricing for supplementary services
- A pricing forecast for Data Centres in the UK from 2015 to 2020
- Key Pricing Trends

Chapter Three – The future developments in the UK Data Centre market

- Introduction
- The key statistics in the UK Data Centre market
- New planned UK Data Centre developments
- A forecast for UK Data Centre raised floor space from 2015 to 2020
- A forecast for UK Data Centre utilisation from 2015 to 2020
- A forecast for UK Data Centre rack space & square metre pricing from 2015 to 2020
- A forecast for UK Data Centre pricing per kW per month from 2015 to 2020
- The key trends taking place in the UK Data Centre market
- Key Point Summary

Chapter Four – Conclusions to the UK Data Centre Pricing – 2014 to 2019 Report

- Appendix One – A glossary of terms used in the report
